 Parakaduwa, Ratnapura

SUMMARY

Third-year Software Engineering undergraduate at the University of Kelaniya with a strong drive to design and build reliable, scalable, and meaningful software solutions. Skilled in full-stack development, software architecture, and systems-oriented problem solving, with hands-on experience. Demonstrated ability to collaborate effectively, coordinate project work, and solve problems in team-driven environments.

EDUCATION

B.Sc.(Hons.) Software Engineering

April 2024 - Present

University of Kelaniya

- Specializing in Net-Centric Applications, Data Science and Engineering Applications, Business Engineering Applications, Health Informatic Applications domains.
- CGPA: 3.2

G.C.E. Advanced Level

2020-2023

- R/Eheliyagoda Central College
- Z-Score: 1.5318
- Combined Mathematics-A
- Physics-B
- Chemistry-B

PROJECTS

Baleen Engine (Individual Project)

[GITHUB REPO](#)

Go, Docker, bbolt, TCP | (Ongoing)

May 2026-Present

- **Developed** a high-performance Docker exportation tool to solve slow transfer speeds, enabling development teams to share heavy container images directly within local, offline, or office networks.
- **Architecting** an integrated CLI and daemon architecture in Go to seamlessly manage continuous background processes alongside user-triggered commands.
- **Designing** a custom state-tracking ledger using **bbolt** to maintain a reliable, historical record of all distributed Docker payloads.
- **Engineering** low-level system communications that leverage raw **TCP Networking** to bypass standard HTTP overhead, focusing on high-throughput socket programming for high-speed Docker image exportation.

Colombo Bookfair Stall Reservation System (Academic – Group)

[GITHUB REPO](#)

Java (Spring Boot), React, PostgreSQL

Feb 2026 - May 2026

- Built a full-stack reservation platform using **React**, Tailwind, and **Spring Boot** to automate event booking workflows.
- Implemented **JWT**-based **RBAC** to enforce secure, role-specific access control for admins, vendors, and staff.
- Designed a **PostgreSQL** database with **Hibernate ORM** to ensure reliable data persistence during high-volume transactions.

KEY SKILLS

- **Frontend:** React, JavaScript, HTML5, CSS3, Tailwind CSS, Redux
- **Backend & Core:** Java, Go, Spring Boot, Node.js, PHP, C
- **Databases:** PostgreSQL, MongoDB, MySQL ,SQLite, bbolt
- **Cloud & Infrastructure:** AWS, Azure, Docker, Linux (Ubuntu/WSL)
- **Systems & Low-Level:** Assembly (NASM), Embedded Systems
- **Tools & Workflows:** Git, Figma

LANGUAGES

- English
- Sinhala
